Tackling digital exclusion

loti

The Mayor of London's Digital Access for All Mission has set a goal for:

“Every Londoner to have access to good connectivity, basic digital skills and the device or support they need to be online by 2025.”

The scale of digital exclusion in London

1 in 20 UK households don't have home internet access *(Ofcom 2022, 2021)*

2 million+ UK households struggle to afford connectivity via broadband or mobile data
(Ofcom 2022, 2021)

10 million UK adults and 1.2 million Londoners lack the most basic digital skills

2.5 million Londoners have low or very low digital capability
(Essential Digital Skills 2022, 2021, Lloyds)

Cannot carry out an internet search

Cannot communicate online with family/friends

Cannot fill in online forms

Cannot order food, medicines online

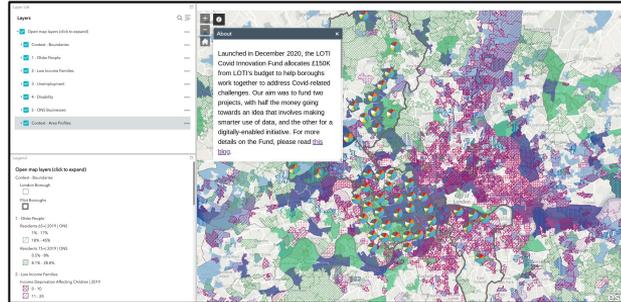

Cannot apply for work online or carry out basic online tasks at work

The Digital Inclusion Innovation Programme - Early Projects

Headline Goal

Develop a “minimum access package” that provides a menu of options to meet individuals’ essential device, data and skills needs.

Mapping Digital Exclusion

Supporting Dementia Care

Community Makers - 2.0

Developing a new paradigm for dementia community services, building on digital knowledge developed through COVID19.

Digital Inclusion in Temporary Accommodation

London Digital Exclusion Personas

User group:
65+ with additional needs

Persona:
Living on an income under £11,500

Eric
Age: 61
Status: Living on an income under £11,500

Needs & Goals

- Being able to have video calls with enable him to better connect with his children
- Having video calls with the GP and hospital consultants to better explain his conditions
- Online food shopping and online banking might become a more attractive proposition if Eric and his wife become mobility impaired

Frustrations

- Eric is not at all interested in the internet
- He does not know how the internet could benefit him or what it would enable him to do that he doesn't do at the moment
- He feels that at his age he doesn't need it and that anything he does need will be provided by his wife or children
- He feels he is too old to start learning new hobbies or getting more connected to the community
- He is resistant to the idea of changing his utilities because of the perceived hassle involved

Digital Inclusion

Get Online London

London's Digital Inclusion Service

Aiming to reach up to 75,000 people in three years.

Hyper-local: working deep in communities to ensure we reach every Londoner who needs help.

Delivered by a network of VCS organisations.

Get Online London

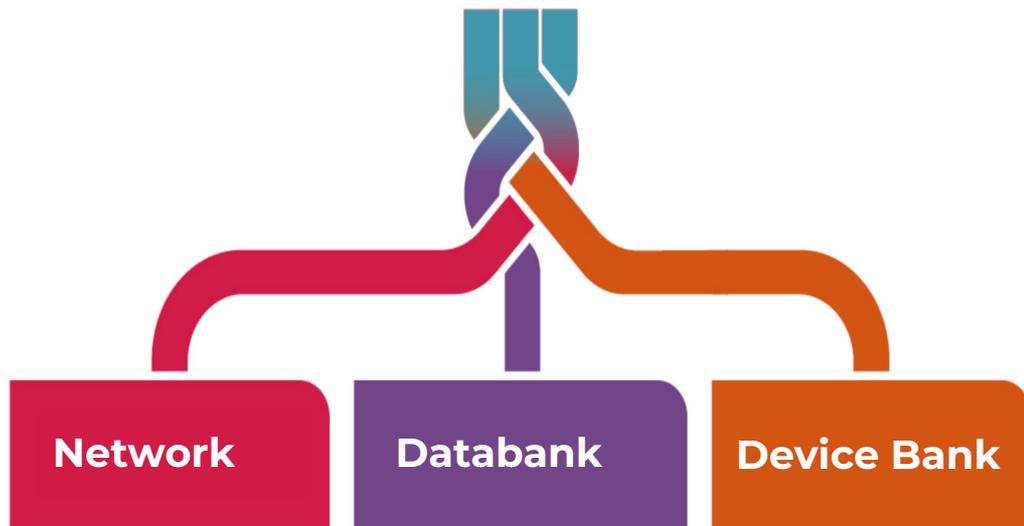

We break down the barriers for digitally excluded Londoners: free device, free connectivity, and the motivation and support to use it in a way that meets people's needs

Get Online London launched in June 2022. It aims to support up to 75,000 people over three years to get online.

Visit:

<https://loti.london/get-online-london/>

Who will benefit?

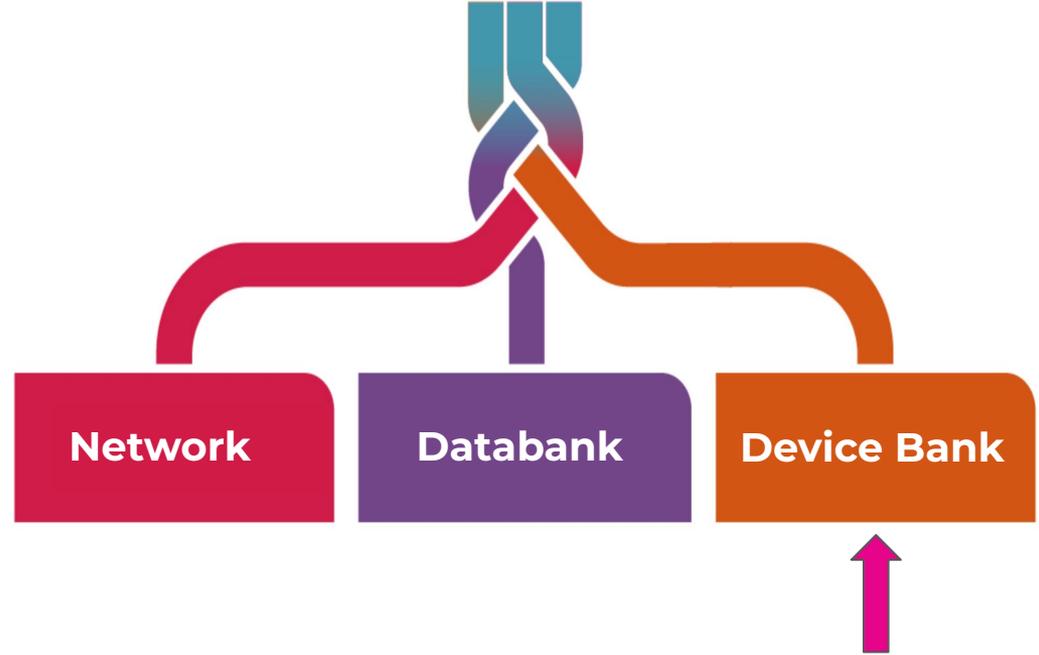

Get Online London will help **digitally excluded adults in London who cannot afford a device, or data or lack basic digital skills.** Families, older people, people with disabilities, people living in poverty, refugees, asylum seekers and people experiencing unemployment will be able to access the service via their local voluntary and community organisation.

The London Device Bank

How it works:

- Any organisation can donate devices and the process is completely free
- This is only possible because of economies of scale and the resale of AV equipment, servers etc.
- The end-to-end process is safe and secure and delivered by our trusted partner, Reconome

The London Device Bank

What we've achieved:

- So far we have distributed **2,890** refurbished devices via **111** VCS organisations across **28** London boroughs
- Redbridge Council has already donated over **1000** of their retired devices and started the process for donating another **1000**
- Building a pipeline for sustainability - we have a large donor of **20k+** laptops

London Device bank: Supporting sustainability

Redistributing technology to those who need it

Working with Reconome, our partner in the delivery of the London Device bank, we ensure refurbished devices are given a new lease of life with those needing affordable and reliable technology. Londoners who are digitally excluded will have access to a device, data and support by our digital inclusion hubs.

The benefits of this approach are many including keeping valuable resources in circulation, saving the planet energy, raw materials and emissions. At a time when Waste Electronics and Electrical Equipment (WEEE) is the fastest growing waste stream in the world, reuse is the most sustainable framework for managing WEEE.

The “Total Impact” snapshot shows the sustainability impact so far.

Total Impacts

The Network

How it works:

- Any VCS or public sector organisation, including libraries and the NHS, can join the network and become a digital inclusion hub
- This is free but there is a formal registration process
- Hubs can benefit from free devices, sim cards, training and grants

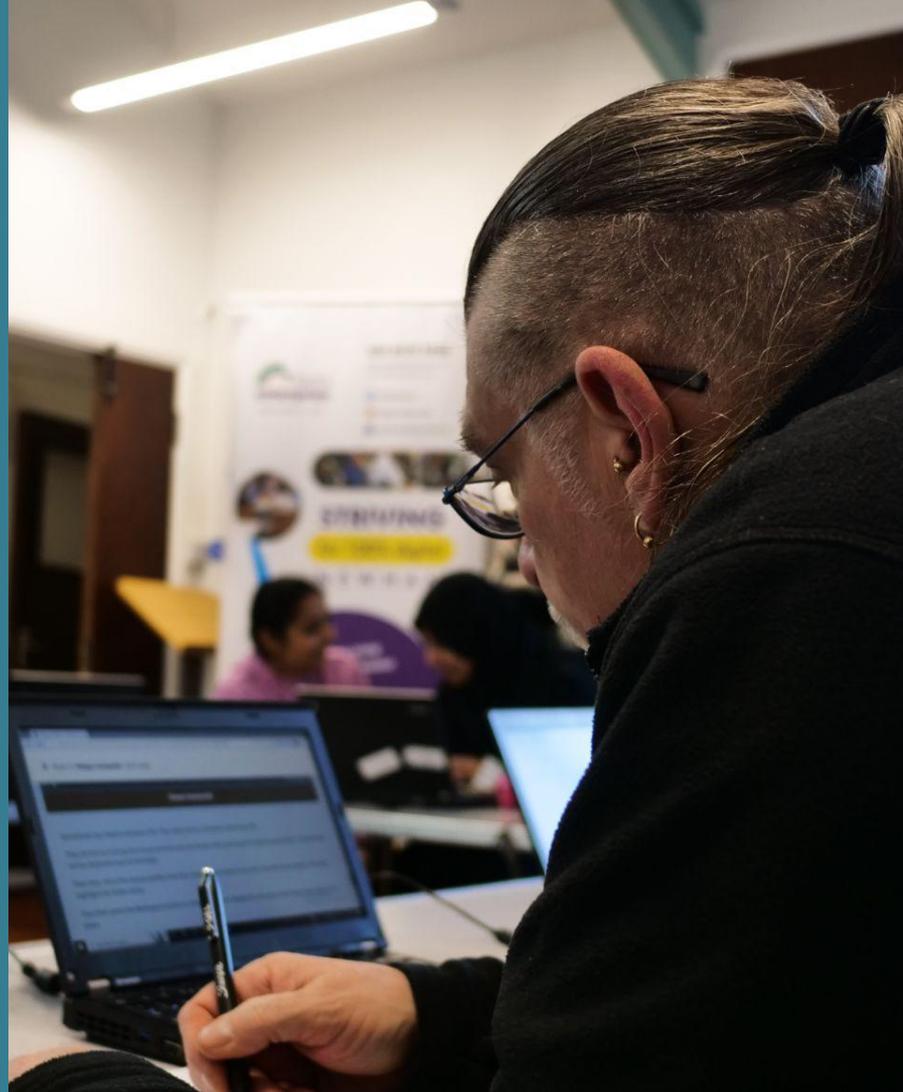

We're growing the London network

641 Digital Inclusion Hubs for Get Online London covering all **32** boroughs

232 are distributing free data through the databank. **30,709 data packages** distributed to hubs

297 hubs are using Learn My Way and **39** have received capability grants

6,082 beneficiaries learning digital skills using Learn My Way

Types of organisations in the network

- Employment advice
- Adult Education Service
- Youth Service
- Day Centre
- Homeless Support Service
- Public Library
- Food or Clothing Bank
- Outreach
- Social Housing Provider
- Central Library
- Citizens Advice
- School
- Hostel or homeless Shelter
- Further Education College

Jo

Jo attends digital drop-ins at her local Get Online London Hub, ClearCommunityWeb. She shared how much she values the opportunity to improve her digital skills:

"In the 7 weeks course we did we looked at scams, I feel more confident now. I felt so afraid but with the lessons that we've learned, I feel that I can look at something and question it and say 'let me check this out'. It has helped me to understand a bit more and I can take my time to go through the lessons. When you don't know, you're afraid but when you have that foundation you can try things and build your confidence. It's really brilliant, I really appreciate it."

Chris

Chris recently received a device through his local Get Online London Hub, ClearCommunityWeb. He told us what this means:

"If you're not involved in this technology, you really are isolated in this day and age - that's actually quite worrying. In a sense it is a completely new world to me and these are just my first tentative steps. This device means that now I can confidently get connected to the online world and start doing things for myself."

How you can get involved?
